Carbon Reduction Plan

Supplier name: NLA INTERNATIONAL LTD

Publication date: 14th August 2023

Commitment to achieving Net Zero

NLA International Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022/23 - Current Reporting Year

Additional Details relating to the Baseline Emissions calculations.

NLA International is a Blue Economy Solutions Consultancy. We do not have an office and all our team work remotely. We therefore have a negligible carbon footprint. We deliver projects remotely and keep our business travel to an absolute minimum.

We are members of the United Nations Environment Programme Finance Initiative for Sustainable Blue Economy. We are working towards the acquisition concessions that will take us from net zero to net negative (absorbing more carbon than we emit).

Baseline year emissions: 2022/23 (July 2022 – June 2023) – Current Reporting Year

EMISSIONS	TOTAL (tCO₂e)
Scope 1	N/A
Scope 2	N/A
Scope 3	Total Flights 1/6/22-31/5/23 = 19.41 CO₂e
(Included Sources)	Total Train 1/6/22-31/5/23 = 0.18 CO₂e
	Total Car 1/6/22-31/5/23 = 0.8 CO ₂ e
	Scope 3 – only business travel is applicable. We are a service company without an office – our team works remotely. There is no waste generated in operations, no employee commuting and no upstream/downstream transportation or distribution.
Total Emissions	20.39

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to $\frac{18}{10}$ tCO₂e by 20<mark>28</mark>. This is a reduction of $\frac{10}{10}$ %

We are already practically net zero currently and we continue to deliver global projects on a remote basis and only travel when absolutely necessary. We engage with local stakeholders in-country to ensure we maintain a minimal carbon footprint.

Communications and data storage are electronic ensuring a paper-free environment and no associated consumables and we use MS Teams for virtual meetings.

It is possible that our organizational setup may change in the future, but we would always ensure that we keep our carbon footprint as low as possible aligning with a goal of net zero by 2050.

Carbon Reduction Projects

In the future we hope to implement further measures such as:

Whilst our business operation is already close to an irreducible minimum, we want to improve bio-diversity, and as our business focusses on Blue Economies, we will continue to invest in approaches that are proven to sequestrate CO2. We will continue to quantify our carbon output and this will be monitored at board level.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹³ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting¹⁴.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard¹⁵.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
